The guides are positioned 12 inches from the wall and 36 inches apart to draw the sides of a doorway. Another guide is used 6 feet, 8 inches from the floor to indicate the top, and then a rectangle, bounded by the guides, which is exactly the right size. When you're done, erase the guides with the Eraser tool.

How to Make and Use Guides for Your SketchUp Models - dummies

USER MANUAL. Framer for SketchUp is a parametric wall framing extension used for modeling stud-framed walls of any customizable size (imperial or metric), with bottom and top plate options, customizable wallboard options, such as OSB, plywood, Zip, Densglass and drywall. Parametric framed openings are easily added and include customizable headers, multiple jacks and sill plates.

USER MANUAL - Estimator for SketchUp

SketchUp. Create 3D models of buildings, furniture, interiors, landscapes, and more. Customize the SketchUp interface to reflect the way you work. Share 3D models as walkthrough animations, scenes, or printouts, with realistic light and shadows. You can even print a model on a 3D printer. Import files from other 3D modeling programs or tools, or export your SketchUp file for use with other popular modeling and image-editing software.

New Woodworker's Guide to SketchUp | SketchUp

Guides are useful for lining up things, making things the right size, and generally adding precision and accuracy to what you're building. In previous versions of SketchUp, guides were called construction geometry, because that's basically what they are: a special kind of entity that you create when and where you need them. They aren't part of your model because they're not edges or faces.

How to Use Guides in Google SketchUp 8 - dummies
