A user guide, also commonly called a technical communication document or manual, is intended to give assistance to people using a particular system. It is usually written by a technical writer, although user guides are written by programmers, product or project managers, or other technical staff, particularly in smaller companies. User guides are most commonly associated with electronic goods, computer hardware and software, although they can be written for any product. Most user guides contain

General guidelines for user manuals. Provide a real (physical) user manual with the product: don't make people read a pdf. Make sure the instructions actually map on to the product in all respects. Include a one-page quick start guide. Present instructions as step-by-step procedures. Tell the user what functions there are, and what they are for - not just how to use them...
