Epidemiology and transmission of Varicella Zoster Virus Varicella occurs throughout the year in temperate regions, but the incidence typically peaks in the months of March through May. According to national seroprevalence data from the pre-vaccine era, greater than 95 percent of persons in the United States acquired varicella before 20 years of age, and fewer than 2 percent of adults were susceptible to infection.

The laboratory diagnosis of varicella-zoster virus (VZV) infections has been improved by the development of techniques and production of new reagents including use of specific monoclonal antibodies (mAbs) to detect VZV viral antigens directly from vesicle smears by immunofluorescence antibody (IFA) staining, eliminating cross-reactivity with other herpesviruses; production of VZV DNA probes for dot-blot hybridization; and in situ hybridization and polymerase chain reaction (PCR) methods to ...

The diagnoses, laboratory tests (including virus quantity), antiviral treatment, and neurological complications were studied. Results: Ninety-seven patients with VZV DNA in the CSF detected by PCR were identified. In 66 patients in whom VZV DNA levels were determined, significantly higher viral loads were found in those with encephalitis and acute aseptic meningitis compared to patients with cranial nerve affection (including Ramsay Hunt syndrome).

Varicella-zoster virus (VZV) is a pathogenic human herpes virus that causes varicella (chickenpox) as a primary infection, following which it becomes latent in peripheral ganglia. Decades later, the virus may reactivate either spontaneously or after a number of triggering factors to cause herpes zos Ⓢ

Clinical-Features-of-Varicella-Zoster-Virus-Infection

Varicella-zoster virus (VZV) is one of eight herpesviruses known to cause human infection and is distributed worldwide. VZV infection causes two clinically distinct forms of disease: varicella (chickenpox) and herpes zoster (shingles). Primary VZV infection results in the diffuse vesicular rash of varicella, or chickenpox.
