MAPP) is an assessment tool, curriculum guide, and skill tracker created for children and or adults with autism. In layman's terms, it is a way to check your child's developmental progress.

Barber shows that New Right theorists, such as Bork, and establishment liberals, such as Ronald Dworkin, are moral relativists who cannot escape conclusions ("might makes right," for example) that could destroy constitutionalism in America. The best hope for American freedoms, Barber argues, is to revive classical constitutionalism - and he explains how new movements in philosophy today allow the Court's friends to do just that. Written in a lively and engaging style.

A language assessment tool for children with autism or other special needs that is based on B.F. Skinner's analysis of verbal behavior and the field of behavior analysis

This book is a resource for teaching young children with autism, PDD, Down syndrome or other language delays. It contains targets aimed at teaching language to children who have skills in the range of non-verbal to pre-conversational, and provides lists o

The Verbal Behavior (VB) approach is a form of Applied Behavior Analysis (ABA), that is based on B.F. Skinner's analysis of verbal behavior and works particularly well with children with minimal or no speech abilities. In this book Dr. Mary Lynch Barbera draws on her own experiences as a Board Certified Behavior Analyst and also as a parent of a child with autism to explain VB and how to use it. This step-by-step guide provides an abundance of information about how to help children develop better language and speaking skills, and also explains how to teach non-vocal children to use sign language. An entire chapter focuses on ways to reduce problem behavior, and there is also useful information on teaching toileting and other important self-help skills, that would benefit any child. This book will enable parents and professionals unfamiliar with the principles of ABA and VB to get started immediately using the Verbal Behavior approach to teach children with autism and related disorders.
