The Wacker Neuson submersible pumps are suitable for a variety of application areas: flood disasters, draining construction sites, pits, or for water penetration in buildings. But the submersible pumps take care of all kinds of challenging tasks in more than just building and civil engineering: the power pumps with a volume of up to 2,440 l/min can also easily handle the task of draining ponds.

The economic and political systems, legal code and religious beliefs of the people of the New Guinea village of Busama were analysed by H. Ian Hogbin in his earlier work, Transformation Scene (1951). In this new study founded on field work carried out at intervals over a seven year period, he is concerned primarily with the individual in his relations with the kinship structure. He takes a typical Busama through a full span of life, from birth through infancy, childhood, adolescence, and marriage to maturity and death; and he shows how each stage in the individual's life involves change in his kinship relationships and responsibilities. This approach gives the professional anthropologist a set of carefully presented data analysed in line with the contemporary emphasis on seeing the relations between kin in the context of the local community, and it also offers the general reader an enjoyable and authentic account of the intimacies of Melanesian life.

This book discusses instrumentation and experimental methods for obtaining detailed information on the structure of various types of flows as well as standard process flow instrumentation suitable for industrial control applications. It assists research-oriented and process engineering personnel.

Supervision is a leveraged activity. When we develop the supervisor's skills, we enhance the productivity of the whole workgroup. This book provides valuable skill training for supervisors, team leaders, and managers. It offers techniques to improve reliability that can be accomplished at the supervisor level. It teaches both the science and the art of the supervision of maintenance workers, discusses managing meetings and time, the elements of technical issues, and presents management and people skills, offering maximum productivity and high-quality provision of services and at the same time, improving morale throughout the workforce. This book is suitable for all types of maintenance for organizations with supervisors and managers from plant operations, storeroom, construction, and related areas including industrial organizations, construction companies, mines, fleets, building maintenance, janitorial maintenance contractors, and vocational tech schools teaching maintenance short courses.

Engaging the Crusades is a series of volumes which offer windows into a newly emerging field of historical study: the memory and legacy of the crusades. Together these volumes examine the reasons behind the enduring resonance of the crusades and present the memory of crusading in the modern period as a productive, exciting, and much needed area of investigation. Crusading was a part of the rich tapestry of family history, with tales of crusading developed as evidence of heroic endeavour to enhance family prestige. Lists of crusaders were published to satisfy this market and heraldry was a visible means of displaying such lineage. Drawing on extensive research and previously untapped sources, this book charts continuing British interest in the crusades, focusing on the nineteenth century. The volume discusses what was available to read on the subject and how this was discussed in numerous journals. Set in the British context of growing local and regional interest in history and archaeology, the study also considers the physical artefacts associated with the crusades. Tales of the Crusaders – Remembering the Crusades in Britain is the ideal resource for students and scholars of the history of memory and crusades history in a British context.

This proceedings book presents a multidisciplinary perspective on risk and risk management. Featuring selected papers presented at the European Risk Research Network (ERRN) 8th European Risk Conference " Multiple Perspectives in Risk and Risk Management " held in Katowice, Poland. It explores topics such as risk management systems, risk behaviors, risk culture, big data and risk reporting and regulation. The contributors adopt a wide variety of theoretical approaches and either qualitative or quantitative methodologies. Contemporary companies operate in a highly dynamic environment, accompanied by the constant development of the information technology, making decision-making processes highly complex and increasing the risk related to company performance. The European Risk Research Network (ERRN) was established in 2006 with the aim of stimulating cross-disciplinary research in the area of risk management. The network includes academics and industry experts from the fields of accounting, auditing, financial economics and mathematical finance. To keep the network lively and fruitful, regular " European Risk Conferences " are organized to present papers from a broad spectrum of risk and risk management areas. Featuring contributions for Italy, South Africa, Germany and Poland, this proceedings book is a valuable reference resource for students, academics, and practitioners in risk and risk management
