Wine Analysis

Free SO₂ By
Aeration
Oxidation
Method

SO₂ means. In the AO method, a wine sample is placed in a flask and phosphoric acid is added to force the sulfite ion into molecular SO₂. A small air pump pushes air bubbles through the sample.

process to prevent oxidation and microbial growth. Excessive amounts of SO₂ can inhibit fermentation and cause undesirable sensory effects.

Free Sulfur dioxide (SO₂) wine analysis
These forms make up what is termed as 'free SO₂'. Free

Online Library Wine Analysis

Free SO₂ can be lost through volatilization or binding, thus management is important. A target of 0.6-0.8 mg/L (ppm) molecular SO₂ has been deemed sufficient to keep wine protected. Charts are commonly available to relate
