“ What is truth? ” — Pontius Pilate had asked Jesus. We all have a lot of questions to ask in life. Knowing the Truth has tried to answer some of the questions just to let the reader understand the attributes of God. In this book, there are different writings that shed light on different types of problems and realities in life. ‘ The Enemy ’ deals with the real but unseen enemy, Satan — his doings, advantages of being unseen and practical insights into overcoming the temptations. ‘ The Vine and the Branches ’ deals with understanding the purpose of being human, in terms of the Creator's expectations of fruitfulness. The other side of King David is to explain the weaknesses of being in the body. It helps us understand the vulnerability we face in the world. God loves us and forgives us for our sinful behaviour, to explain a few things that we face in life.

The beauty of the book is in simplicity

Real Essays with Readings is the essay-level book in Susan Anker ' s highly successful series of writing texts that motivate students with their message that writing is an essential skill in college and in real life — and that this skill is achievable. Anker ' s advice, examples, and assignments show the relevance of writing to all aspects of students ' lives, and profiles of former students prove that success is attainable. Like all the books in the Anker series, Real Essays presents writing in logical, manageable increments: step-by-step writing guides and a focus on the "four basics" of each mode of writing keep students from becoming overwhelmed. Real Essays gives students what they need to succeed in college and become stronger academic writers.

The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we ' re never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive impact on the choices we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed.
